Build 10 identical copies. This board has no active parts and no power supply.
2.54 mm pairs are labelled by function, not motherboard physical pin number. Connect by motherboard manual.
Pin 9 goes to separately verified host signal ground. Pin 10 stays NC at both cable ends.
To save a separate PCBA setup: order bare PCBs and hand-solder connectors, or substitute a crimped Y harness.

SCHEMATIC REVIEW — not a fabrication release
